

DON'T let **FROZEN PIPES** happen to you this winter!

Keep thermostat above 20 degrees when the temperature outside is below freezing.

Don't leave windows **OR** patio doors open when temperature outside is below freezing.

Avoid covering radiator with furniture **OR** long drapes.

Keep heat vent open when heat is required **OR** keep it partially closed if you want the room cooler.

You will be held responsible for any damage due to frozen lines should you fail to follow the above instructions.
